

January 22, 2011

To Whom It May Concern:

As we begin 2011 and have now been in our home on Perkey Road a couple of months, we are so thankful for the opportunity we had in building our new home with Dave Schertzing! Since initially meeting with Dave at the 2010 Home and Garden Show at the MSU Pavilion, he clearly stood out from all the other builders. He was personable, very interested in what we wanted to accomplish, and he gave us the feeling that he had a true passion for his profession.

Dave actively listened to us throughout the entire building process, he had our best interest at heart and was always willing to address any concerns we had. Dave's ability to clearly communicate with us was shown through almost daily e-mails or phone calls. We were kept informed of the construction timeframe guidelines, which kept us on target and also allowed us to make timely decisions on all the specifications that made our home unique to us. We were impressed with his organizational skills and enjoyed his attitude and "can do" spirit. We always knew the timelines and financial considerations of our choices and we found him very fair about the cost of our change orders.

The quality of the craftsmanship in our home continues to impress us. It was obvious that Dave has a strong relationship with the subcontractors he hires. This is evident throughout the house but especially in the details around the kitchen, paint quality, trim and the exterior work. We truly feel that our home was custom built for us.

We found working with David G. Schertzing Builders, Inc. a rewarding and satisfying experience. We would not hesitate to build another home with Dave.

Sincerely,

Tony and Tina Brandt - Perkey Rd , Charlotte Michigan
