To Whom It May Concern:

This letter of introduction is written to all who wish to utilize the services of David Schertzing, David G. Schertzing Builders. In 1994 my wife and I contracted with Dave to construct our new home.

Over the course of construction, we found Dave to be the total professional, demonstrating his passion and care for our project. His attention to detail matched our needs in realizing "Dream Home". He recognized he was not only building a house but he was building our HOME.

Our project was completed on time and within budget. We received what we expected and appreciated the quality Dave instilled in this project. I would not hesitate to recommend David to anyone who desires to work with a professional builder who can deliver within expectations.

I have developed and maintained a professional relationship with Dave over the years. Dave has provided critical advice on building matters. I served as Director of the Bureau of Construction Codes for the State of Michigan for more than 18 years. In this position I was responsible for the development and application of the State's construction requirements. Dave's knowledge and advice provided the guidance from a builder's perspective to improve the standards used for the construction new homes.

Dave also understands the issues surrounding the renovation of existing homes. He is well respected by his peers and colleagues. He understands materials, practices, and the standards for quality construction.

In 2006, Dave participated in the production of a video project to advise new home buyers on how to select a builder. His skills were aptly demonstrated in the home he constructed and was used in the video. His commentary on how to select a builder, what to expect in the building process and how to achieve the most efficient building were exceptional.

This video, earned the prestigious 2006 Silver Telly Award. The Telly Awards honor the very best local, regional, and cable television commercials and programs, as well as the finest video and film productions, and work created for the Web. The Silver Telly Award is the highest honor for such productions.

This award was given in large part based on the comprehensive nature of the program. Dave's participation was instrumental in achieving the value of providing guidance to consumers on how to select a Builder and how to achieve a quality construction project. Dave demonstrates this ability and the knowledge to deliver in each of his valued projects.

In my new capacity of President of the National Institute of Building Sciences, I continue to rely on Dave for his knowledge and skills in determining the most appropriate standards for safety in housing for the United States.

You will be well served in contracting with David G. Schertzing for your HOME...

Sincerely

Henry L. Green
