

David Schertizing Builder Recommendation

To whom it may concern

We Hired David late August 2014 to take on the project of remodeling our basement, which included adding a full bath, game room / living space.

We moved into a new house (not newly built) the basement was unfinished and it was imperative for us to build a full bath, Office Space and Recreation type room.

We had interviewed a handful of builders and what I really liked about Dave was his no-nonsense get it done right work ethic.

Throughout the whole construction process Dave kept us fully aware and informed of all steps and progress.

We had one small emergency over a weekend, I called Dave and he was right over to help rectify the situation. I found Dave and his contractors to be honest, ethical, kind, fair and reasonable. If I have work done on my house in the future I would definitely call Dave first. I would also highly recommend him to family and friends (which I already have done)

We are extremely pleased with our basement (living space, office and bath) it is so warm, inviting and Homey!

Thank you Dave for all your hard work, your honesty, integrity and work ethic. You are a gentleman and a pleasure to work with.

Respectfully

John Kossak
