Re: Addition 3 Season Porch.

Dave,

June and I would like to personally thank you for the professional attitude that you and your staff shown throughout this past winter at our home. The dedication of you and your workers is to be commended as you completed our project early in one of the harshest winters on record in the Lansing area!

Your attention to detail and suggestions made during the project were given to us in a manner that made us feel you were working in your own home. At no time did we feel pressured to make a decision and your assistance was greatly appreciated throughout the entire project.

Your schedule was kept even though the temperatures were well below zero and we literally had to tell you to go home and not worry about the time frame for completion. You were spot on with the budget and all of your estimates from the initial meeting through the end of the project.

In closing, we highly recommend you as a professional builder and project manager. We have enjoyed numerous nights in the porch. As you informed us, the addition is well insulated and utility friendly with both our heating and AC bills!

Thank you very much!
