

03Nov14

Dear Dave,

Thank you very much for the wonderful job you did building Erik's and my new home! We love it! You were always (and continue to be) very responsive in answering any of our questions and having any problems fixed right away.

I feel as though you went above and beyond your job by meeting with us with our architect, helping us choose the perfect location on our land to place our home, loaning us your space heaters when the power went out the night we moved into our home due to the ice storm and you figured out a way to build most of our entire home without electricity at our lot due to issues outside of your control.

You are always very friendly and honest! When other builders might've encouraged us to go with more expensive options, you really tried to have Erik and I think about what we wanted and consider choosing a more reasonable option or to even complete certain projects in future years. You built a very quality house for Erik and I with Huber zip walls, 2 x 6 wall construction, floor joists placed closer together than the majority of builders and you created a well-insulated home. You even framed in our laundry room in the basement yourself so that our washer and dryer wouldn't be sitting in the middle of an open basement.

You have a great attention to detail and made sure that our home was built properly. You made sure that everything was done to code and met your standards. You ensured that our home was always clean throughout the building process and that the nails and debris were picked up. Many of our friends who have walked through our home have been very impressed with its construction.

Not only were you friendly and wonderful to work with, but Erik and I really enjoyed all of the workers that you chose to complete various jobs on the house. Many of the workers would talk to us while they worked and would explain to us what they were doing and why, which we found very interesting and informative. The workers we've been in contact with after moving into our home have also been very kind and quickly fix any issues that we've experienced that occasionally arise after moving into a new home.

Dave, Erik and I really can't imagine building a home with anyone else and we're very thankful we were able to have the opportunity to build our first home with you! You made the process as smooth as possible. Thank you for all of your hard work, dedication and attention to detail on our home!

Best,

Erik and Megan Segur
