

November 2008

Dear Prospective Client,

David G. Schertzing Builders managed the construction of our new home in 1992 and an addition to it in 2008. We have been very pleased with both the construction process and the results in each case! Dave Schertzing has an "old-fashioned" quality known as integrity, and therefore you can trust him to manage this significant investment of your resources.

In deciding to build a new home, we spent several years looking for the right home site and builder. In the course of that search we met many builders, and had extensive discussions with several. Dave is the one builder who seemed to recognize that he was building our HOME, not just a building. He demonstrates respect and consideration for his customer's vision and is easy to work with.

We wanted our home be one of quality for a reasonable cost. Dave Schertzing was able to accomplish this goal. He takes pride in his work and in producing well-designed, structurally sound, and energy-efficient homes. Starting with the basement, we were impressed with his site preparation. His sub-contractors were dependable and did excellent work. This was especially important with the remodeling, when it was necessary to have the contractors working in our home while we were present.

Dave stayed in touch very well during construction. He was always available by phone or e-mail. He will see that your job gets done correctly and that you are happy with the results. There are many builders in the market, but we believe David G. Schertzing Builders stands out above the others!

Sincerely,

*Carolyn and Tom Soule*
