

Our opportunity to work with Dave was an unexpected and very pleasant experience!

This past Fall, we decided to give our kitchen a much-needed refresh. As with all the updates we have done to our custom home over the years, we wanted to preserve the layout and character of the space, while giving it a fresh look. It can be such a challenge to find just the right person to achieve this.

When the representative from the stone company came out to measure the countertops, without hesitation he said, "you need to call Dave Schertzing."

Although this was such a small job for a Builder like Dave, he not only agreed to run our job, but he treated it as if he was building us a million dollar house! He coordinated the job from start to finish. Every tradesman he sent over was top notch, on time, and neat as a pin. He took care of EVERY detail and the entire project was completed on time for Thanksgiving dinner in just 3 ½ weeks.

Thank you Dave!
